Activities for 9 November, 2012 - Interim Report Status (New Jersey)

Activity	Location	County	Summary of Items Assessed	Who Contacted/Involved	Significant Observations	Potential for Additional Needs/Follow-up
HazMat Assessments						
	Barrier Islands in Ocean County <i>Pt. Pleasant - Seaside Park</i>	Ocean	Initial assessments to determine if any imminent environmental threats present which would need to be addressed prior to additional crews (restoration, etc.) returning to islands.	NIDEF and Ocean County Health Department	The team completed a rapid shoreline assessment of the barrier islands in Ocean County to determine the presence of any imminent environmental threats. The team completed the assessment and noted no issues of significant environmental concern which need to be addressed at this time.	No additional EPA assistance required at this time.
	Keansburg, Keyport, Atlantic Highlands, and Union Beach	Monmouth	Team assessed four townships in Ocean County for orphan containers and to survey towns for other potential environmental concern.	NIDEF and Monmouth County representative.	Team identified two drums in Union Beach; 1 gas cylinder, 4 tanks and 5 drums in Keyport; and heating oil tank in Keansburg. No other notes of environmental concern were identified. The team observed a several damaged homes but noted there was not a significant amount of HHW currently present at the site.	Coordinate removal and continue communication with NIDEF and County. <i>identified several orphaned containers</i>
	Bayway/Phillips 66	Union	Remediation progress of two on-site releases and storm (nor'easter) preparation.	RP, NIDEF, USCG, NOAA <i>Federal State</i>	Remediation continues at the property. RP stated they anticipate the removal work in the cemetery area will be completed by this Sunday. The cemetery area will then be transferred to the remedial group within Phillips 66 and will be monitored under the NJ State LSRP program. Removal of oily debris and oily water continues in the Reservoir area. The RP has made significant progress in their cleanup efforts and have demobilized several contract personnel and equipment. The RP's most recent estimate was that 117 barrels of oil have been recovered from the ERB discharge and one barrel of oil has been recovered from the Tank 310 discharge. Wildlife impacts continue to be addressed by the RP.	Continue oversight. NIDEF requested OSC attendance at meeting with Natural Resource Trustees. <i>NRDA is scheduled for next week</i>
HazMat Response						
	Barnegat	Ocean	Removal of drum contents	N/A	The response team successfully removed the contents of the two drums in Barnegat NJ at a private residence's location.	No follow-up required.
	Toms River	Ocean	Removal of submerged AST	N/A	Team successfully removed a 275-gallon submerged heating oil tank from Toms River inlet. Prior to removal, the AST was up righted and the contents were removed via a vacuum truck. After removal, the tank was properly marked and temporarily staged by the team for ultimate disposal.	Follow-up to ensure AST is properly disposed.
Waste Water Assessment						
	PVSC	Essex	Focus remains on getting system up and operational.	USCOE, EPA, PVSC	Field crew reported: 1) ERRS crew has begun steam cleaning of basement; 2) Dewatering and repair of facility continues; 3) primary treatment continues; and 4) Meetings continue to facilitate coordination, assistance and communication.	Continued support during on-going damage assessments and assistance during dewatering of tunnels.
	MCUA	Middlesex	Team continued to provide assistance in support of returning the site to operations.	OSC, ERT, Dive Personnel, MCUA, USACE, OSHA, SERAS, ERRS, EMS and USAR.	At 13:48 the sluice gate installation was complete and the diver was out of the water without incident. MCUA declares that dewatering of the pumping is underway.	Continue to provide support as necessary.
